

# Driftwood Star

Ornament Size: 3-7 inches

Skill Level: Beginner-Intermediate

## Supplies needed:

- 5 pieces of driftwood or sticks (straight shape, of equal sizes)
- Twine
- Paint and glitter (optional)
- Foam paint brush or artist brushes
- Wire to hang ornament
- Sealant (optional)

## Instructions:

1. Gather driftwood with a straight shape, and equal sized pieces. Driftwood should be long and thin. Sticks may be used in lieu of driftwood.
1. Note: River driftwood above the lower floodplain is preferable to ocean driftwood. Ocean driftwood is sandy and often needs to be dried first.
2. Use a paintbrush to add paint and/or glitter to driftwood if desired. Let the paint dry.
3. Secure the star corners with twine.
4. Apply sealant if necessary.
5. Secure wire through the top of the star and hang on tree.

See photos for other options for securing driftwood or sticks as trees or snowflakes.
