

Welcome to the Health Career Exploration Project!

HCEP is here to help students investigate their interest in healthcare through educational opportunities and career exploration. Healthcare is a thriving job market and Humboldt County has many opportunities for those interested in the abundance of these diverse and rewarding professions.

The Health Careers Exploration Project (HCEP) collaborates with Humboldt County school sites and industry professionals to inspire and support local students.

Students involved with HCEP have the privilege of learning opportunities within the classroom as well as on-site with industry professionals. These could include hearing from guest speakers, learning to measure vital signs, touring worksites, learning professional success skills, job shadowing, and more.

We are thankful to all of the industry partners in our community, the Workforce Development Board, College of the Redwoods, and all of whom are committed to this learning opportunity.

For more information or questions, please feel free to explore the website and/or contact me directly. Thank you for your interest!

Sincerely,

Michele Schneider, MA, ATC
