

My Superhero

By:Alaina

Her name is
Ozone

About Ozone

Ozone uses her hair to turn the garbage into dust that doesn't hurt the environment.

Ozone turns beaches
from this

Into this!

Ozone does it because she wants to make sure that the generations after her can live in a clean world with clean water and the streets aren't filled with trash

Ozone doesn't do it all by herself. She asks other people to help, so every week, with the help of other people, she gets two beaches clean. This means she cleans 104 beaches in a year.

When Ozone is not cleaning beaches she usually plays with her dog Bear who she takes to play on the beach.

Ozone started because one day she was taking Bear to the beach and when she got there it was covered in trash.
