

REEF Wild Things presentation: Animals of North America

Q: Why are these animals living with Gabe at Wild Things and not in the wild?

Q: What are raccoons like Ruckus actually doing when it looks like they are “washing their hands” in water?

Q: What will striped skunks like Pepé do when they feel threatened before spraying their protective stinky oil?

Q: How does Preciousss the Northern Pacific rattlesnake get new buttons on her rattle?

Q: What adaptations does Preciousss have for hunting in the dark?

Q: How is Archimedes the great horned owl adapted to hunt at night so successfully?

Q: Why do mother Virginia opossums have pouches for carrying their babies that are shaped like envelopes?

Q: How can you help keep wild animals in the wild?

Teachers, email Mel McGuire at melmcguire@yahoo.com for a document with the answers.
